

Patient Safety Issue: Opioids and Related Drugs
MPA Upper Peninsula Division Fall Seminar
October 1, 2017
Rose Baran Pharm.D.

Objectives:

At the end of this activity the participants should be able to:

1. Describe the evidence for patient harm by the misuse of drugs.
2. Identify how the use of opioids and related drugs may be a patient safety issue.
3. Identify ways to enhance patient outcomes and safety for patients using opioids and related drugs.
4. Identify ways technicians may help in the recognition of patient misuse of opioids and related drugs.
