

# Talk to Your Pharmacist Today About:

National HIV  
Testing Day  
JUNE 27TH

THAT'S MY  
PHARMACIST<sup>SM</sup>

## DID YOU KNOW?

- HIV is a virus that weakens the body's immune system that defends against diseases.
- HIV is spread through contact with bodily fluids, most commonly from:
  - o Unprotected sex with someone who was HIV
  - o Sharing used needles, syringes or other things used for injection into the body
- 50,000 Americans get infected with HIV every year.
- There are 1.2 million Americans infected with HIV and many do not know they have become infected.
- Many drug stores have quick tests you can take to see if you may be infected with HIV.

## WHAT CAN YOU DO?

Talk to your pharmacist about HIV testing and ways to avoid becoming infected.
