

Well Street Care Management™ strives to be a leader in the design and implementation of innovative medication therapy management (MTM) services provided by pharmacists and pharmacies.

Well Street is now offering an **educational MTM resource manual**, including:

- A **self-study module** that contains clinical care guidelines for asthma, diabetes, hypertension and hyperlipidemia
- Sample **documentation forms**
- **Automated slide presentations** covering the medication therapy management process in the step-by-step manner listed at the right.
- A **self-assessment tool** to ensure comprehension of the materials

- **Module 1:** What is Medication Therapy Management
- **Module 2:** The Core Elements of a Medication Therapy Management Service
- **Module 3:** Introduction to Drug Therapy Problems
- **Module 4:** Drug Therapy Problems
- **Module 5:** Resolving Drug Therapy Problems
- **Module 6:** The Patient Care Process
- **Module 7:** The Assessment
- **Module 8:** Documentation Principles
- **Module 9:** Establishing Goals of Therapy
- **Module 10:** Conducting a Patient Encounter
- **Module 11:** Conducting a Timely Encounter

CONTINUING EDUCATION

This manual also includes an application to request **10 hours of home study continuing education credits**. Credits will be awarded for successful completion and evaluation of the educational modules and self-study materials.

Michigan Pharmacists Association is accredited by the Accreditation Council for Pharmacy Education (ACPE) as a provider of continuing pharmacy education. ACPE Program #112-000-11-003-H01-P, 10.0 contact hours. Initial release date: 3/21/2011, Expiration date: 3/21/2014. Knowledge-type activity.

Learning Objectives:

1. Identify the key components of a medication therapy management service
2. Determine the key elements of a medication action plan
3. Describe a systematic approach to identifying drug therapy problems
4. Describe the documentation requirements involved in the resolution of a drug therapy problem
5. Identify questions to ask patients during the patient assessment process
6. Identify documentation standards to be followed by pharmacy practitioners
7. Identify communication tools that will aid the practitioners in conducting a patient encounter
